

Planning workflow reference for consultation, donor strategy, and case review.

Document date: 2026-08-09

WORKFLOW

- Create a structured consultation plan.
- Coordinate donor mapping, graft visibility, and clinic team preparation.
- Review case information before procedure day.

TEAM ROLES

- Surgeons review and approve clinical decisions.
- Assistants and coordinators use planning outputs to maintain procedural clarity.

DATA DISCIPLINE

- Keep patient records controlled by approved clinic processes.
- Export and report only information intended for clinical review.
